

OFFICE PRACTICUM[®]

PEDIATRIC SOFTWARE

Office Practicum pediatric EMR/PMS is a robust system, a one-stop solution to the software needs of the busy pediatric practice. Each and every feature was, and continues to be, designed and engineered to address the needs of pediatricians enabling them to easily handle the day-to-day demands of their business.

With Office Practicum pediatric EMR/PMS your day can become *less labor intensive* and *more patient attentive*.

Join the ranks of pediatricians across the United States using Office Practicum pediatric EMR/PMS to manage their busy practices.

Call Visual Data, LLC for more product information, to discuss any aspect of Office Practicum, or to schedule a live, over-the-web demo which will allow you to explore the entire system and pose any questions you might have, directly to a qualified trainer.

The Home of Office Practicum pediatric EMR / PMS

Visual Data L.L.C., a prospering Manhattan-based software company is home to Office Practicum EMR/PMS. In development for ten-years, and making an impact in the marketplace since 1998, the success and demand for Office Practicum continues to grow.

Office Practicum is installed on over 1,000 desktops, in 75+ practices, and is trusted by over 350 doctors in 17 states. Practices using Office Practicum across the United States range in profile from very large multiple providers, large support-staff practices, to solo pediatricians starting their own practice and opening without support staff. All of the practices using Office Practicum are pediatric, excluding three (3); a Podiatry Clinic, a Women & Family Health Clinic, and a 35+ provider adult AIDS clinic.

Our satisfied clients and their successful practices are a testament to the performance of Office Practicum. As a result of praise and positive feedback generated by our current users, Office Practicum is establishing itself as a leading solution to the needs of modern pediatrics.

The team of highly-skilled programmers and consulting pediatricians at Visual Data is dedicated to addressing the specific needs of clients, meeting the changing demands of pediatrics, and conforming with future EHR mandates.

In our commitment to delivering an EMR that works, we in turn work closely with doctors, office staff in several pediatric practices, and several hospital-based clinics, which provide invaluable ongoing input and have served as the 'laboratory' for software upgrades.

At Visual Data, our approach sets us apart from larger competitors not only in terms of performance and results, but client services.

We believe in maintaining strong client relationships and ensuring the user is always satisfied. We provide individual support and close attention to the needs and questions of Office Practicum clients. If a problem or a simple concern arise our staff, and a solution, is only a phone call away.

Office Practicum Electronic Patient Chart

At Visual Data L.L.C. we continue to be aware of the important considerations and decisions required before investing in an EMR. When investing in Office Practicum your returns are not only evidenced in solutions for your practice, but also in the benefits of the overall Office Practicum experience: affordable and manageable cost; learning and integration made enjoyable by an excellent training staff; and dealing with a company that measures its success in terms of product and service quality.

The partnership of programmer and pediatrician behind the concept and design of Office Practicum provides a unique advantage strongly evident in the efficiency and savvy of the software and its invaluable ability to address and solve the workplace problems faced by pediatricians.

You dedicate yourself to pediatrics. When you evaluate EMR and practice management systems shouldn't you question the dedication and commitment of the company, and the compatibility of the system to pediatrics?

We at Visual Data, LLC believe that we can measure our commitment to pediatrics through 10+ years of service and program development.

Contact us for a free, live, over-the-web demo, or to discuss any aspect of Office Practicum. We are happy to answer any questions you might have.
